

Video Sign Language Interpreting

Where Innovation, Service, and Savings Converge

Accommodating the Deaf Community and complying with ADA and HIPAA regulations is essential, but can be prohibitively expensive and difficult to manage in many situations. Video Sign Language Interpreting (VSLI) is a practical solution that can save money over traditional interpreting methods, eliminating the need for costly minimums, processing fees and travel charges while enabling businesses, healthcare professionals, government agencies and educational institutions to access qualified and experienced interpreters at a moment's notice.

Key Benefits:

- Access to Sign Language Interpreters in situations with an immediate and/or emergency need;
- Makes Sign Language Interpreting possible in rural and remote areas;
- Enables quick access to Sign Language Interpreters for conducting triage and intake paperwork;
- Easy to use and cost effective with no requirements for pre-scheduling of appointments;
- Industry changing lowest cost per minute with plans tailored to your specific needs;
- Seamless access for Doctor's rounds, routine exams, follow-up appointments and admissions paperwork;
- Immediate, efficient and low-cost alternative to on-site interpreters when one is not available.
- Ideal for pharmacy's, medical practices, law offices, retail stores and most business environments where emergency situations, unplanned meetings or walk-in clients arise;
